INDIGO

TRANSPORTERS

WHY SHOULD YOU HAVE A HAPERT INDIGO?

Your vehicles, tools and equipment are expensive and you will only recoup your investment if you are able to maximise their use. This is why it is vital for them to arrive at their destination both safely and quickly. Without any fuss and bother. That's why you should have a HAPERT INDIGO.

HT-2

LF-2

The HT models are fitted with:
- a double-acting hydraulic cylinder with a hand pump
- an adjustable winch plus bracket
- a fixed Combi Protect Rail on the sides and front
- tyres 195/50 R13

The HT model is supplied as standard with a continuous drive-on ramp, 1000 mm high. The galvanised ramp features a gas spring system for ease of use and has an open grating profile with anti-slip effect. This continuous drive-on ramp is particularly suitable for transporting machines. For transporting cars, we recommend the option "2 loading skids in aluminium integrated under the floor".

The binding bracket system integrated into the sides has a capacity of up to 1000 kg per bracket.

3

The load securing system is TÜV-certified. The LF model features four safety steps on the sides.

4

The rear of the LF models has a drive-on ramp in one piece of approx. 1500 mm with brackets. Optionally available: two steel drive-on ramps. These ramps are width-adjustable. The ramps consist of an open anti-slip grating profile and are full-immersion galvanised.

6

All of the Indigo models have a fully-welded, hot-dip galvanised chassis. The LF model has the added advantage of extra stringers. This model is fitted as standard with a multiplex floor panel.

10 YEAR CHASSIS WARRANTY

BUILT TO LAST.

It is vital for you to have absolute confidence in your trailer, particularly when your operating processes depend on it too. That's why we develop the very strongest and sturdiest trailers you will find anywhere in Europe. Our tried-and-tested welding technology makes us unique and we supply transport solutions that have got what it takes to take on any job.

Various options are possible, including:

For the HT models:

- Aluminium drive-on ramps under the trailer
- A hinging Combi Protect Rail
- Aluminium dropsides 300 mm high
- Various floor options, such as:
 - 2 drive-on paths 600 mm wide with an oval hole structure
 - an open, anti-slip grate surface
 - aluminium profile floor

For the LF models:

- Aluminium profile floor instead of a plywood floor
- Excavator bucket support
- 2 drive-on ramps 1500 mm long
- Parabolic suspensions incl. shock absorbers (3500 kg models)
- Tyres 185/70 R 13 C including black rims
- Removable aluminium dropsides, weldmesh side-extensions, ladderracks, covers etc.
