

SAPPHIRE H: THE IDEAL, HIGH-QUALITY CLOSED TRAILER

Thanks to the welded, hot-dipped galvanised substructure as well as the incredibly strong superstructure, the Sapphire H models are eminently suitable to transport your valuable cargo from A to B without any problem.

The closed trailers (up to and including 400 x 220 x 210 cm) have been provided with a plywood wall construction with a thickness of 15 mm, made from one piece. Models with a size larger than 405 x 200 x 210 cm are, as a standard, equipped with insulated panels with a thickness of 25 mm, made from one piece. Another appealing feature includes the super smooth ABS panels (max. 400 x 200 x 210 cm), allowing easy stickering of your trailer. Logos and advertising will look even more attractive!

The Sapphire H superstructure has, as a standard, been provided with 2 rear doors with stainless steel lock, stainless steel hinges, and stainless steel fasteners. Numerous other options and accessories are available as well, including a side door, a tail ramp, sliding or rolling hatches, and presentation hatches.
