HAPERT COBALT

TIPPERS

COBALT HM: FAST AND EFFICIENT UNLOADING OF YOUR CARGO

This three-sided tipper can be used on a daily basis to transport bulk material. The robust tipper will also prove to be the ideal workhorse to accompany your excavators. Because the Cobalt HM can tip on three sides, this trailer is ideal in confined areas.

As a standard, the Cobalt HM has been provided with a steel floor and an electric pump with a battery, allowing you to unload your cargo very quickly and efficiently. After all: time is money.

The Cobalt HM has been provided with the special HAPERT locking system. This system will ensure that the dropsides are closed and that the front rack, the removable walls, the raised cover, or the wire racking can be secured. You can hit the road with confidence.

**BRING
IT ON.**
